The disclosure is objected to because of the following informalities: In line 4 of claim 42 the period after "secured" should be deleted.

Appropriate correction is required.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 22-28 and 42 are rejected under 35 U.S.C. 102(a) as being anticipated by Krampl (U.S. Patent 6,814,215).

Krampl shows an escalator having a frame 1 which forms a support structure between an entry and an exit having a perforated plate structure 2 with cut-outs 20 which extend over a significant portion of the height of the frame.

Re claim 23, shown are sections where the cut-outs extend over approximately half the height of the frame 1, see end section of Figure 1.

Re claim 24, taught are some cut-outs as having round or non-straight sections.

Re claim 25, some cut-outs are round or oval.

Re claim 26, Figure 2 shows a base plate connected to the side plates 3.

Re claim 27, welding is disclosed.

Re claim 28, identical patterns are shown.

Re claim 42, the shown supporting structure can mount further structural components.

Claims 29-41 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
